Art Unit: 1755

The following is an examiner's statement of reasons for allowance: The amendments to claims 8 and 21 have overcome the art and obviousness-type double patenting rejections since the newly claimed formulas are not taught or suggested by the cited art of record. The amendments to the claims have also overcome the 35 SC 112 second paragraph rejections. The 35 USC 112, first paragraph rejections are withdrawn since one of ordinary skill in the art would understand that the majority of the phosphor resulting from the claimed processes has the claimed formula, but that it can also comprise impurities. Thus the phrase "phosphor comprises a material having the formula" is not new matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
